KHUSHI SINGH

B.Tech | Electronics & Communication Engineering (Avionics)

Central University of Jammu, Jammu, India | Email: [your email] | Phone: [your phone number]
LinkedIn: linkedin.com/in/khushi-singh-96194737b

PROFESSIONAL SUMMARY

Motivated B.Tech student specializing in Electronics & Communication Engineering (Avionics), with a strong interest in aerospace systems, embedded electronics, sensors, and space technology. Currently contributing to a low-cost radiosonde development project involving microcontrollers, environmental sensing, GPS, and LoRa communication. Eager to learn from industry professionals and contribute to practical engineering projects through an internship.

EDUCATION

B.Tech — Electronics & Communication Engineering (Avionics)

Central University of Jammu, Jammu, India | Currently pursuing undergraduate studies

SGPA: 9.22 (as previously provided; update if this is no longer your latest result)

PROJECT EXPERIENCE

Low-Cost Radiosonde Development | Academic/Team Project

- Working on a low-cost atmospheric data collection system designed to measure environmental parameters and support weather/atmospheric studies.
- Exploring integration of an ESP32 development board, SX1278 LoRa communication (433 MHz), BME280 environmental sensor, and NEO-6M GPS module.
- Contributing to system configuration, component research, block-diagram preparation, and technical documentation.

TECHNICAL SKILLS

Embedded & Hardware	Arduino basics, ESP32, sensor interfacing concepts, GPS and LoRa module integration concepts
Programming	C/C++ fundamentals, Python fundamentals
Tools & Design	Arduino simulation, KiCad (learning), Fusion 360 / 3D design exposure (learning)
Professional	Technical documentation, presentation preparation, teamwork, event coordination, creative design

CERTIFICATIONS & LEARNING

- Arduino Beginners Course — Certificate of Completion
- Continued self-learning in embedded systems, PCB design, aerospace/avionics fundamentals, and electronics tools

ACTIVITIES & ACHIEVEMENTS

- Participated in an Arduino simulation/project competition organized by the Central University of Jammu Innovation Club.
- Engaged in Aerospace and Avionics Club activities, including technical collaboration and event support.
- Attended DevFest Jammu to explore technology, community learning, and professional development.
- Supported event communication/design work, including invitation-card design and coordination for university activities.

INTERNSHIP INTEREST

Seeking an internship opportunity in embedded systems, electronics, avionics, aerospace technology, IoT, or hardware prototyping. Open to remote/online opportunities and guided project-based learning.
